COLLEGE CODE : 9505

COLLEGE NAME : Dr. Sivanthi Aditanar College of Engineering

DEPARTMENT : Information Technology

STUDENT NM-ID : 0C4C4D8D317DF6A8330468F3CB5D95C8

ROLL NO : 11234055

DATE : 06/10/2025

Completed the project named as

Phase 5. Project Demonstration & Documention

NAME : To-Do List Application

SUBMITTED BY,

NAME : A.Uchini Makali

MOBILE NO : 8525047373

1. Final Demo Walkthrough

Your project is a **To-Do List App** with the following features:

- Add, edit, and delete tasks.
- Set task **priority** (Low, Medium, High).
- Set **due dates** with overdue task highlighting.
- Mark tasks as **completed** (strikethrough effect).
- **Search filter** for quick task lookup.
- **Dark/Light** mode toggle**.**
- **Local Storage** support (tasks persist after reload).

2. Project Report

1. Project Title

To-Do List Application

2. Abstract

The To-Do List Application is a web-based productivity tool that helps users efficiently manage their daily tasks. The system allows users to add, edit, delete, and search tasks with customizable priority levels and due dates. It includes a dark/light mode toggle, ensuring a pleasant user experience across devices. The application stores data locally using the browser's Local Storage, making it lightweight and accessible without any backend server.

3. Objectives

- To develop a simple, interactive, and user-friendly To-Do List web application.
- To provide efficient task management with priority and deadline tracking.
- To enhance productivity through easy task visualization and control.
- To improve user experience with features like dark mode and search filtering.
- To ensure persistence using LocalStorage for saving tasks locally.

4. Technologies Used

Category	Tools / Technologies
Frontend	Bootstrap 5
UI Framework	Bootstrap 5
Storage	Browser LocalStorage
Deployment	Netlify / Vercel
Version Control	Git & GitHub

5. Features

✅ Add, delete, and edit tasks

✅ Assign task priority (Low, Medium, High)

✅ Add due date for each task

✅ Search bar for quick task lookup
✅ Dark / Light mode toggle
✅ Responsive UI with Bootstrap
✅ Task persistence using LocalStorage

6. Enhancements (Phase 4 Additions)

- Added **Dark/Light Mode Toggle**.
- Implemented **Search Filter** for easy navigation.
- Improved **UI/UX Design** using Bootstrap 5.
- Enhanced **Performance & Responsiveness** for all screen sizes.
- Added **Priority Dropdown** and **Due Date Calendar Input**.

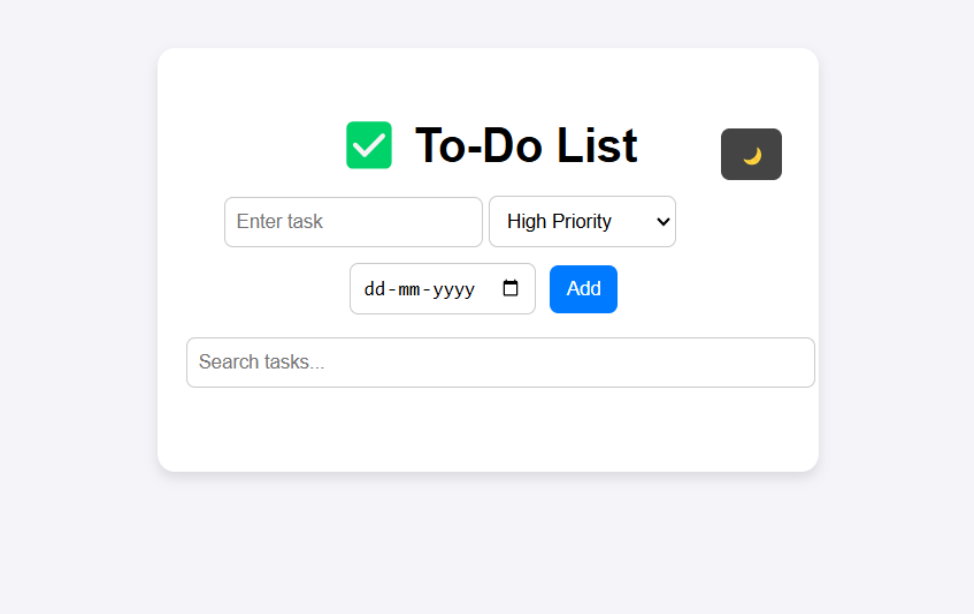
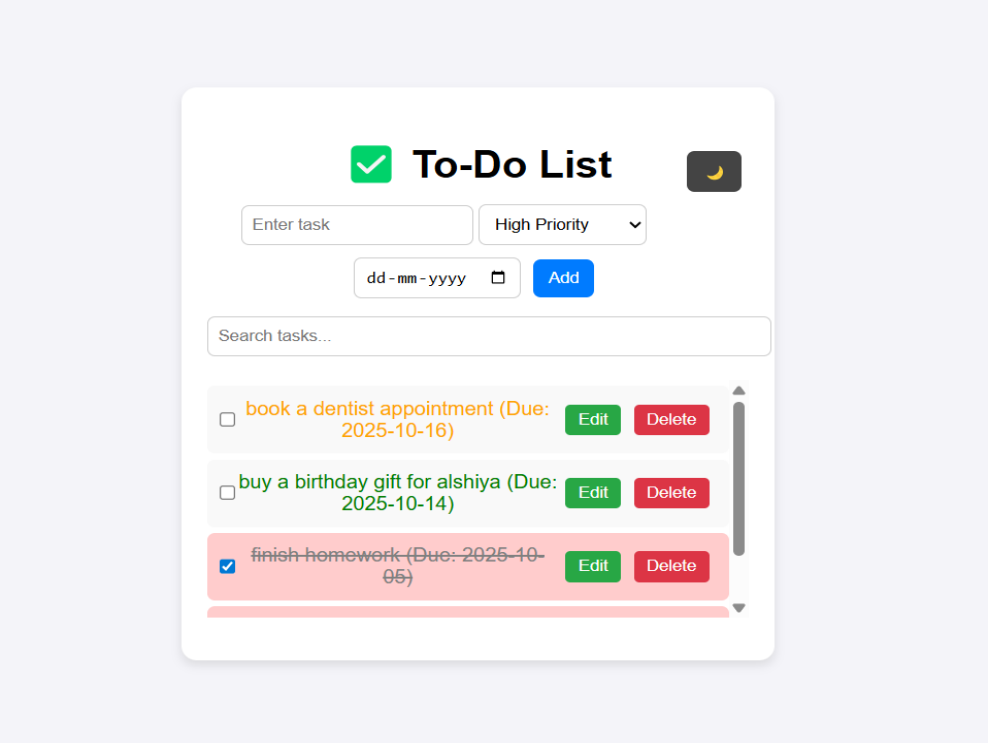
1. Task Entry Form

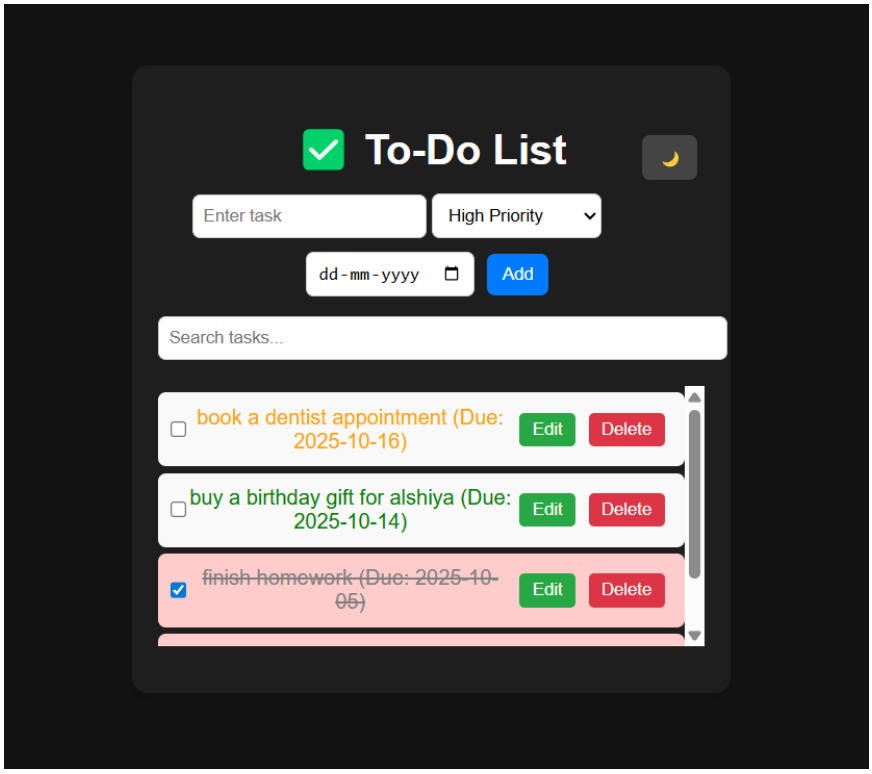


2. Added Tasks

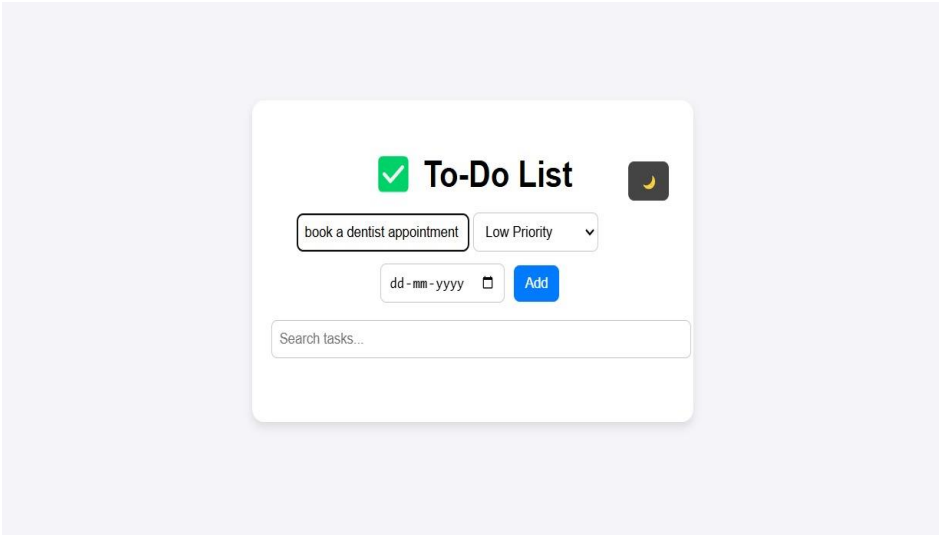


3.Dark/Light Mode

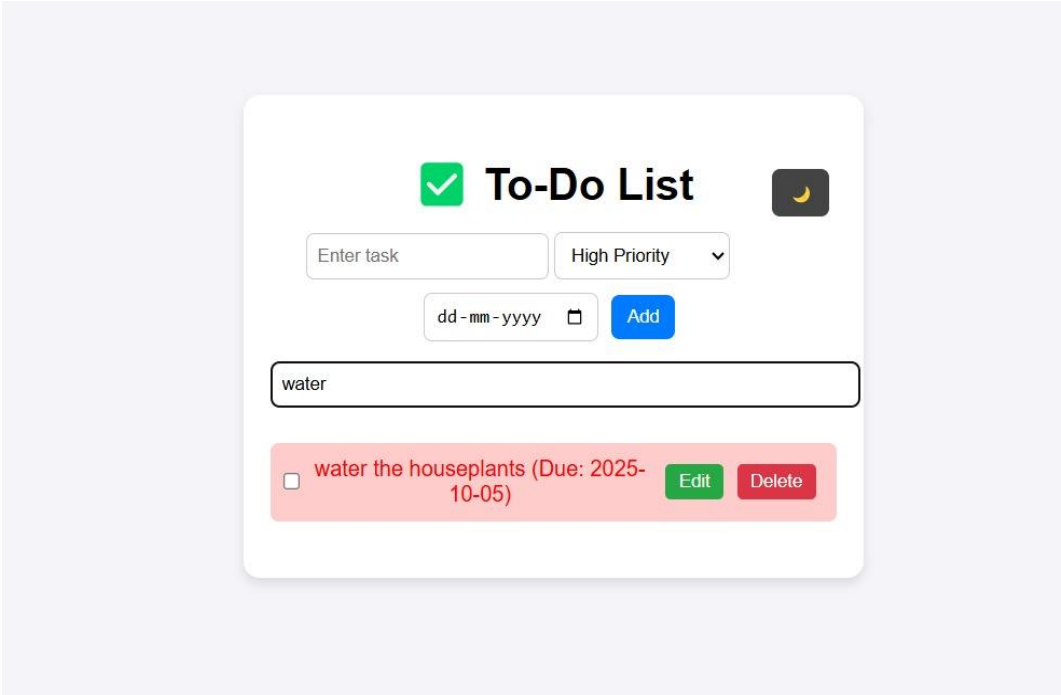
Dark Mode:



Light Mode:



3.Search Functionality:



Challenges & Solutions

- **Challenge**: Making tasks persist after page refresh.
- **Solution**: Used localStorage.setItem() and localStorage.getItem().
- **Challenge**: Designing responsive UI.

- **Solution**: Applied Bootstrap grid system.
- **Challenge**: Implementing search functionality
- **Solution**: Filtered tasks dynamically using JavaScript includes() function.
- **Challenge**: Theme color switching logic
- **Solution**: Used JS to toggle dark and light CSS classes
